

I claim:

1. (Currently amended) A toilet paper dispensing container having an opening which allows the release of a toilet roll, the container accommodates a plurality of rolls accessible, one at a time, via an opening ~~portion~~ in the front lower portion of the container wherein the container has an extendable strap and track mechanism which holds all of the rolls in place in the container above the roll that is to be released, *such that when the opening on the front of the container is opened the strap extends to an extended position so that it sits below the roll to be dispensed holding it and others above it in place and when the opening is closed the strap slides into the track mechanism and gravity allows the next roll to drop into position ready to be dispensed when required.*
2. (Currently amended) A toilet paper dispensing container as claimed in ~~any preceding claim~~ *claim 1* wherein the opening ~~portion~~ has on its lower surface a finger slot in which a user inserts his / her finger to pull a toilet roll out ~~A toilet paper dispensing container as claimed in any preceding claim wherein and when the opening on the front of the container is opened the strap extends to an extended position so that it sits below the following roll to be dispensed holding it and others above it in place and when the opening is closed the strap slides into the track mechanism and gravity allows the next roll to drop into position ready to be dispensed when required.~~
3. (Currently amended) A toilet paper dispensing container as claimed in ~~any preceding claim~~ *claim 1* wherein a pivoted lid is provided at the upper end of the container to allow filling of the container.
4. (Currently amended) A toilet paper dispensing container as claimed in ~~any preceding claim~~ *claim 1* wherein the opening in the front of the container has a finger access slot into which a finger is inserted to allow the opening to be opened, the opening being hinged on one side.
5. (Currently amended) A toilet paper dispensing container as claimed in ~~any preceding claim~~ *claim 1* wherein the container has a viewing aperture allowing a user to view how many rolls are contained in the container.
6. (Currently amended) A toilet paper dispensing container as claimed in ~~any preceding claim~~ *claim 1* wherein mounting holes are provided on the rear of the container to allow the mounting of the unit on a suitable surface.
7. (Currently amended) A toilet paper dispensing container as claimed in ~~any preceding claim~~ *claim 1* wherein reinforced mounting holes are provided on the rear of the container to allow secure mounting.
8. (Currently amended) A toilet paper dispensing container as claimed in ~~any preceding claim~~ *claim 1* wherein the front of the container is in the form of a slideable, removeable faceplate and also comprises the opening for releasing toilet rolls.

9. ~~(Deleted) A toilet paper dispensing container as claimed in claim 9 wherein the removable face plate is provided with a viewing aperture allowing a user to view how many rolls are present in the container.~~
10. (Currently amended) A toilet paper dispensing container as claimed in ~~any preceding claim~~ *claim 1* wherein toilet paper roll alignment bars are provided on the inside of the container to hold the toilet rolls therein in place.
11. (Currently amended) A toilet paper dispensing container as claimed in ~~any preceding claim~~ *claim 1* wherein the container is angled so that the container can be mounted in a corner crevice where two walls meet.
